Art Unit: 1743

1. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 5 are incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: some sort of a structure to contain the catalyst or sorbent such that the upstream and downstream regions are free of the catalyst or sorbent. In claim 2 it is not clear how the process limitation provides any further structural limitation. In claims 3 and 7 it is not clear if there are three containers – the elongated container of claims 1 and 5 plus the inner and outer perforate containers of claims 3 and 7 – or if the container of claims 1 and 5 and the outer perforate container are the same.
2. Claims 3 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. The art of record fails to teach or fairly suggest the structure of these claims.
3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additionally cited art is related to catalyst testing and inner and outer perforate covers in a device to sample the gases flowing in a pipeline.
